SUMMARY

Highly motivated software engineering student with proficiency in programming languages and frameworks. Dedicated and enthusiastic individual with a passion for continuous learning. Embracing new challenges and technologies with agility, fostering personal and professional growth.

TECHNICAL SKILLS

HTML & CSS
JavaScript
React JS

Git & Github
Design tools: Figma
Adaptability & continous learning

Problem solving & Debugging
Team collaboration
Optimistic

PROFESSIONAL EXPERIENCE

Quality Assurance Intern   **Dec 2024 - Feb 2025**

- Collaborated with the QA team to test web and mobile applications for functionality, usability, and performance.
- Executed manual test cases, reported bugs using tools like plane, and worked closely with developers to track resolutions.
- Participated in regression and exploratory testing to ensure product stability before release.
- Gained hands-on experience with software development cycles and Agile workflows.
- Improved documentation by writing clear test cases and updating test result logs.

EDUCATION

Advanced Diploma in Software Engineering   **2023 - 2025**

Aptech Computer Education
- Completed a rigorous two-year programme focused on full-stack software development, database design, UI/UX principles, and project management.
- Built real-world applications using React, JavaScript, HTML/CSS, and Python; practiced clean code and modular architecture.
- Designed intuitive user interfaces with Figma, transforming wireframes into responsive web apps.
- Developed and queried relational databases using MySQL.
- Gained hands-on experience in software testing and version control (Git/GitHub).
- Proficient in multiple programming languages including Java, Python, JavaScript, and C#.
- Delivered several team and solo projects across domains like e-commerce, city guide apps, car websites and number-checking algorithms.
